

DYNAMIC ROLLER CLEANER SG

Glaze Remover & Cleaner for UV Inks and Oil-Based Inks

DESCRIPTION OF THE PRODUCT

Glaze remover and cleaner for both UV Inks and oil-based inks. Abrasive is not contained, and the roller surface will not be damaged when cleaning. Effectively removes glaze build-up from inking rollers on all printing press types and sizes. Regular use of this product when cleaning inking rollers will prevent glaze build-up.

KEY FEATURES AND BENEFITS

- Can be used as a regular maintenance cleaner for inking rollers.
- Prevents glaze build-up on inking rollers with regular use.
- Uniforms ink transfer and flow on inking rollers.
- Avoids the risk of transportation and storage with its non-flammability.

DIRECTION OF USE

1. Remove wet ink from rollers first using a regular press wash
2. Shake the bottle well before using . Do not dilute
3. With the press idling, apply a small amount solution evenly across the top roller.
Repeat two to three times.
4. Wait 3-5 minutes.
Do not allow roller train to dry during this process.
5. Engage wash-up blade and wash inking rollers with a regular press wash or an emulsion wash.
6. Wash inking rollers until the collected cleaning agent by wash-up blade is clean.

Caution:

If plate is spotted with the solution, flush immediately with a plenty of water.

TYPICAL PHYSICAL PROPERTIES

Flash Point	Not flammable
pH	8.7-9.1
Vapor Pressure	Miscible
Specific gravity	0.95-0.99 at 20°C
Odor	Petroleum odor
Color	White

PACKAGING
500 mL
